Florida Agricultural & Mechanical University

Where it all began...

Black abolitionist, Jonathan C. Gibbs, first introduced legislation to create the State Normal College for Colored Students in 1885, one year after being elected to the Florida Legislature. The date also reflect the new Florida Constitution of 1885, which prohibited racial integration in schools. The college was located in Tallahassee because Leon County and adjacent counties led the state in African-American population, reflecting Tallahassee's former status as the center of Florida's slave trade.

On October 3, 1887, the State Normal College for Colored Students began classes, and became a land-grant college four years later.
